No. 454.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING POSSESSIONS

[IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "customs area," which includes continental United States, Alaska, Hawaii, and Porto Rico, but not other outlying possessions. Consequently trade between continental United States and Alaska, Hawaii, and Porto Rico is not covered by the figures, while trade between these three possessions and foreign countries is so included. On the other hand, trade between continental United States (also Alaska, Hawaii, and Porto Rico) and foreign countries is included in the totals. (2) In the totals trade between it and Alaska, Hawaii, and Porto Rico is included while their trade with foreign countries is excluded. (3) In the case of the continental United States with Guam and American Samoa, the figures represent the trade of the home country with foreign countries and with all outlying possessions.]

**No. 472.—INDEXES OF CHANGES IN QUANTITY, PRICE, AND VALUE OF
IMPORTS AND DOMESTIC EXPORTS**

[NOTE.—The purpose of these indexes is to eliminate the effect of price changes upon the total value of trade. They have been constructed by the so-called ideal formula, the essential feature of which is the use as weighting factors the quantities of the commodities in the base year. For many commodities the quantities are not available because of various reasons. In such cases the value of the commodities is used as a weighting factor. For two-thirds of the total value of imports and exports the quantities are used. For the remaining one-third the value is used. The quantities of articles of heavy value were linked directly to 1913 and each subsequent year was compared with that preceding. The resulting percentages were made into a series by the chain method.]
